Techmark Japan and Jaccs Lease start new warranty service for lease cars

Techmark Japan, extended warranty provider, and Jaccs Lease, car lease firm and member of JACCS Group, started a car extended warranty program for lease cars.

This program is offered to the customers who contract Jaccs Lease's car lease program which comes with periodical car maintenance services. The program covers costs of repairs in the event of a mechanical breakdown for five (or 0.1M km) or seven (or 0.14M km) years depending on a plan. JACCS customers can use the leased car without worrying about having to pay for sudden breakdowns after the manufacturer warranty expires. This program is provided at some of the registered Jaccs member stores and will eventually be provided nationwide.
